Profile

With experience in Frontend Web Development, I specialize in crafting seamless digital experiences. My ability spans HTML5, CSS3, and JavaScript frameworks like React.js, complemented by ability in SQL databases such as MongoDB and backend languages like C# ASP.net MVC Core Web API.

Throughout my career, I have led transformative projects from revitalizing legacy systems to launching innovative web applications that consistently exceed client expectations.

I am enthusiastic about staying ahead of industry trends and fostering collaborative partnerships. I welcome the opportunity to discuss how my skills can contribute to your projects.

Experience

QUANTUM FINTECH LEAP| FRONTEND WEB DEVELOPER | OCTOBER 2023 - PRESENT

- Designed and developed visually appealing and intuitive layouts for websites and web applications, enhancing user experience and engagement.
- Developed and supported part libraries and style guides, ensuring design consistency and reusability across projects.
- Implemented front-end performance optimization techniques, improving load times and overall website speed.
- Worked closely with backend developers to integrate frontend code with server-side logic, ensuring seamless functionality and performance.
- Applied responsive design principles to support website functionality and accessibility across different devices and screen sizes.

AYOUB COMPUTERS | IT TECHNICIAN (INTERNSHIP) | OCTOBER 2022 – FEBRUARY 2023

- Aided in troubleshooting hardware and software issues, ensuring minimal downtime and best performance for end-users.
